PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer specializing in Natural Language Processing (NLP), Large Language Models (LLMs), Generative AI, and Deep Learning. Proven ability to build AI-powered applications, intelligent automation systems, text-processing pipelines, and scalable machine learning workflows. Proficient in developing data preprocessing solutions, feature engineering pipelines, and AI-driven products using TensorFlow, PyTorch, Hugging Face Transformers, and Scikit-learn. Passionate about solving real-world problems through conversational AI, predictive modeling, and cutting-edge AI research.

TECHNICAL SKILLS

Programming Languages	Python, SQL, JavaScript
AI/ML Frameworks	TensorFlow, PyTorch, Hugging Face Transformers, Scikit-learn, Pandas, NumPy, OpenCV (Basics)
AI/ML Technologies	NLP, LLMs, Generative AI, Deep Learning, Neural Networks, Reinforcement Learning (Foundational)
Specialisations	Prompt Engineering, Text Preprocessing, Feature Extraction, Model Evaluation, Predictive Modelling
Tools & Platforms	Jupyter Notebook, Google Colab, Git & GitHub, Docker, Linux, IBM Cloud, AWS (Basics), VS Code

PROFESSIONAL EXPERIENCE

AI & Cloud Intern Edunet Foundation + AICTE (IBM SkillsBuild) *Internship Program*

- Completed practical training in Artificial Intelligence, Machine Learning, and Cloud Computing on IBM SkillsBuild.
- Developed and executed end-to-end ML workflows covering data preprocessing, model training, evaluation, and AI pipeline design.
- Gained hands-on exposure to cloud-based deployment concepts and intelligent automation systems.
- Collaborated on AI-focused learning modules, applying real-world problem-solving approaches across diverse datasets.

KEY PROJECTS

Jarvis-Like Smart AI Voice Assistant *Python | NLP | TensorFlow | PyTorch*

- Designed and developed an AI-powered voice assistant leveraging NLP and deep learning for natural language understanding.
- Implemented voice command recognition, intent parsing, and intelligent response generation with scalable architecture.
- Integrated reinforcement learning concepts to enable adaptive, context-aware assistant behaviour.
- Built end-to-end conversational AI functionalities with modular, production-ready design principles.

AI-Integrated Agriculture Recommendation System (EcoKrishi) *Machine Learning | Python | MERN Stack | AI Recommendation Engine*

- Built an AI-driven agriculture support platform delivering intelligent, data-backed crop and resource recommendations.
- Implemented predictive modelling and collaborative filtering workflows to power real-time recommendation engines.
- Engineered scalable backend integration with secure authentication and role-based access control.
- Enhanced farmer decision-support through intuitive UI and explainable AI-powered insights.

Emergency Alert & Response System *AI Workflow Design | Intelligent Automation | System Architecture*

- Architected a scalable emergency response application with structured incident triage and categorisation logic.
- Designed AI-based smart alert-handling pipelines and automated assistance workflows for real-time scenarios.
- Focused on intelligent system architecture, fault tolerance, scalability, and real-time event processing.

EDUCATION

B.Tech – Computer Science Engineering	Indore Institute of Science & Technology, Indore	*2022 – 2026*
Diploma – Computer Science Engineering	Shri Vaishnav Polytechnic College, Indore	*2020 – 2023 | 72%*
Secondary Education (Class XII)	Achievers Academy Higher Secondary School, Pithampur	*2020 | 81%*

CERTIFICATIONS & ACHIEVEMENTS

- IBM SkillsBuild – AI Fundamentals
- IBM SkillsBuild – Python for AI
- IBM SkillsBuild – Cloud Computing
- Participant – Smart India Hackathon (SIH)
- Naukri Campus Young Turks – 95.41 Percentile
- TCS CodeVita – Rank 5,530
- Built AI-focused projects spanning NLP, Generative AI, and intelligent automation systems.
- Strong command of AI/ML model lifecycle: design, training, evaluation, and deployment.
- Active researcher in Deep Learning, LLMs, TensorFlow, PyTorch, and advanced AI domains.
